CALL FOR PARTICIPATION
38th IEEE International Performance, Computing and Communications Conference
http://ipccc.org

October 29th - 31st, 2019
Hilton London Kensington
London, England, UK

The International Performance, Computing, and Communications Conference is a premier IEEE conference presenting research in the performance of computer and communication systems. For almost four decades, IPCCC has been a research forum for academic, industrial, and government researchers. We encourage submission of high-quality papers reporting original work in both theoretical and experimental research areas. This year over 60 papers, short papers and posters will be presented. The full program is available on our website: https://ipccc.org/ipccc2019/program.html

Day 1
5G & The Internet of Skills In Action

Prof Mischa Dohler
Chair Professor, King's College London
Fellow, IEEE RAEng IET & Royal Society of Arts
Cofounder, Worldsensing

Website: www.mischadohler.com

Day 2
The Many Layers of Delay Requirements

Prof Carsten Griwodz
Professor, University of Oslo
Co-founder, ForzaSys AS

Website: https://www.mn.uio.no/ifi/english/people/aca/griff/index.html

Conference Topics

Day 1	Day 2	Day 3 (half-day)
Big Data Processing and Analytics	Caching	Parallel and Distributed Systems
Computer Networks	Security - Network Intrusion Detection	Machine Learning and beyond
Deep Learning	System Performance & Testbeds	
Security - Hide and Seek	Security - What's going on?	
Poster Reception	Edge and Cloud	
	Constructive Security
